4 x = \$400+
 = Call for Details

New block no house

\$200 Cash Back!!

Hi,
Because I've wired Hundred's of sheds of this style, I've developed a system that is neat & efficient (which saves you money!!) - ALL of the wiring is concealed in conduit (for safety) and screwed to the underside of steel frame so that it is unseen as much as practical - all for these great prices.

If I wire your shed and you can find one of your mate's sheds that is wired more professionally and looks better i'll give you **\$200** back.

I'm confident you will be happy with the results.

Thanks
Brad Kennedy
